

LANDSCAPE PAINTING PREP:

CREATE A TONAL SKETCH

Our next classroom project will be painting a landscape on canvas with acrylic paint. To prepare for this project you are going to start laying out your landscape and use values of gray to render your landscape.

- Look at the Landscape Vocabulary Document to review some basic elements of a landscape.
- Choose a picture on line or one you have taken on a trip. Draw a the image in a simple line drawing. After you have the initial layout start applying shades of gray to define areas: foreground, background, etc.
